 Portfolio
 Website

I have created my first simple HTML page in 2001 as a hobby project. From 2013, I am seriously involved in web development using Ruby and Rails for building apps, RSpec and Capybara for testing, JavaScript, jQuery and Ajax for interactive effects and Bootstrap, Foundation and Sass for styling.

WORK EXPERIENCE

2017 - now

Magentys

QA Engineer

I started work in January as consultant at Chelsea Apps Factory. My responsibility is to improve the agile development process by providing automation (regression) tests for a banking app and helping the developers with the CI.

2014 - 2016

Web Development Training

Projects:

Nursery Website

Company website with admin, public and parents sections.

<https://github.com/raditotev/nursery>

My Website v.2

My personal website containing admin and public sections. Consisting of landing, about, portfolio blog and contact pages.

<https://github.com/raditotev/my-page>

Facebook Clone

Facebook clone app, allowing users to create posts, write comments, 'like' other user's posts and send and receive friend requests. Omniauth allows users to sign in using their real Facebook account.

<https://github.com/raditotev/odin-facebook>

My Website v.1

My old single page personal website.

<https://github.com/raditotev/my-portfolio>

Random Quote Generator

Generates random quote via API callback. When the Twitter icon is clicked, Twitter's submit form is pre-populated with the quote text, author and quote hash tags.

STACK

Ruby
Rails
Cucumber
RSpec
Capybara
JavaScript
jQuery
CoffeeScript
Bootstrap
Foundation
SASS
PostgreSQL
MySQL
Bash
Git
AWS S3
Calabash
Xamarin Test Cloud

EDUCATION

2016

Free Code Camp

Front End Development

2015

Udacity

Intro to Programming Nanodegree

2001-2003

Fachhochschule Deutsche Telekom, Leipzig

Telecommunications

1992-1997

School of Technology, "Electronic System Engineering at the Technical University of Sofia"
Specialist in Computer Engineering and Technologies,
BTEC National Diploma

Pomodoro Timer

Countdown app. Countdown starts with session time. When the time is over there is a bell to notify the user it's time for break. When the break time is over the user is once again notified it's time to get back to work.

<https://github.com/raditotev/pomodoro-timer>

Simple Calculator

JavaScript, jQuery calculator.

<https://github.com/raditotev/js-calculator>

Twitch Board

Page showing a list of Twitch streamers using Twitch's API. Online and streaming users are placed on top of the list and highlighted in green. The list can be filtered via buttons and show All, Online or Offline users only.

<https://github.com/raditotev/js-calculator>

Wikipedia Search

Searches Wikipedia for given query via Wikipedia's API. Returns first 10 pages. "Feeling lucky" redirects to random page.

<https://github.com/raditotev/wiki-search>

Weather App

Displays current weather for user's location. Data is received from open weather API.
